Fun with words – Meanings in Context

fished out = searched for and pulled out carefully

jungle = thick forest found in regions around the equator

relative = a person connected by family ties

sometimes = once in a while, not always

termites = ant-like insects that live in groups in large nests made of mud

Tidbit – Helpful Hint

> Humans beings and Chimpanzees are related, for we have evolved from a common ancestor. Scientists studying Humans and Chimpanzees have found we are about 94% similar in our genetic structure. The term 'brother' in the poem simply signifies that we are connected in the web of life.
